SAVE A LIMB

STAY AMPUTATION FREE

**8-12
MILLION
AMERICANS**

are affected by
Peripheral Artery
Disease (PAD)

**September is Peripheral
Artery Disease Awareness
Month.**

PAD affects 8-12 million Americans, but often goes undiagnosed because its symptoms—like leg cramping while walking or slow healing foot wounds—are frequently dismissed as normal aging.

South Texas and the Rio Grande Valley experience some of the **highest diabetes and vascular related amputation rates in the United States.**

To help **SAVE A LIMB**, South Texas Vascular Institute will be offering

**FREE ABI
SCREENINGS**

to those highest risk including:

- ✓ Individuals 65 and older
- ✓ Smokers
- ✓ Diabetics
- ✓ Those with high blood pressure
- ✓ Those with high cholesterol
