The Health Insurance Marketplace helps uninsured people find health coverage.

No one plans to get sick or hurt, but most people need medical care at some point. * Health insurance protects you from unexpected, high medical costs. * You pay less for covered in-network health care, even before you meet your deductible. * You get free preventive care, like vaccines, screenings, and check-ups, even before you meet your deductible.

The Fee for not having Health Insurance

If you can afford health insurance but choose not to buy it, you must pay a fee called the individual shared responsibility payment. **You'll pay whichever is higher.**

PERCENTAGE OF INCOME

2.5% of household income

Maximum: Total yearly premium for the national average price of a Marketplace Bronze plan

PER PERSON

\$695 per adult

\$347.50 per child under 18

Maximum: \$2,085

You pay the fee when you file your federal tax return for the year you don't have coverage. In some cases, you may qualify for a health coverage exemption from the requirement to have insurance. If you qualify, you won't have to pay the fee.

Most people who apply qualify for premium tax credits that lower the costs of coverage. Some also qualify for savings on deductibles, copayments, and other costs. All plans cover:

- Essential health benefits
- Pre-existing conditions
- Preventive care

What's covered in the Health Insurance Marketplace

- Ambulatory patient services (outpatient care you get without being admitted to a hospital)
